---

hardy\_books

*Tidy data frame of 7 of Thomas Hardy's novels*

---

### Description

Returns a tidy data frame of 7 of Thomas Hardy's completed, published novels with two columns: `text`, which contains the text of the novels divided into elements of up to about 70 characters each, and `book`, which contains the titles of the novels as a factor in order of publication.

### Usage

```
hardy_books()
```

### Value

A data frame with two columns: `text` and `book`

### Examples

```
library(dplyr)

hardy_books() %>% group_by(book) %>%
  summarise(total_lines = n())
```

---
